1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grey et al., is the US equivalent of the cited British reference. Winner teaches an inserted key for activating an actuator for a dispenser. Dyer teaches mating interlocks for securing a dispenser. Caparrelli et al., and Frazier et al. teach cartridge dispensers inserted into sockets with mating pins and apertures, but do not teach a mechanism to move the pins from a retracted to an engaged position. Specht teaches the use of a mating pin and aperture. Therien et al. teaches a dispenser with a set of pins 88 that are moved from a retracted to an engaged position as shown in figures 3-5, but uses the pins for spacers and does not teach the use of mating apertures.

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a cartridge and socket dispenser with a plurality of pins and mating apertures that includes a mechanism to move the pins from a retracted to a deployed position upon insertion of the cartridge into the socket.

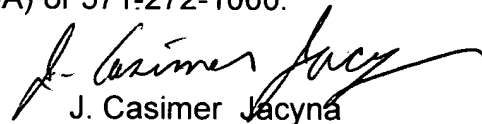

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
